Reports to

Chief Technical Officer

Job Brief
We are currently hiring a Network Administrator to join our team and be responsible for maintaining and supporting our networks.

Main Responsibilities of a Network Administrator
Your main responsibilities will include:

Monitoring, configuring and maintaining existing networks and making upgrades where required

Network planning and adopting appropriate network protection solutions

Install & integrate new hardware and applications

Ensuring network security & connectivity

Monitor network performance (availability, utilization, throughput, goodput, and latency) and test for weaknesses

Liaising with third-party vendors

Troubleshooting network issues or outages

Providing technical support to end users

Key Requirements
You possess a degree/diploma in Computer Science, Engineering or a related field

You have prior experience in a network administrator role

Hands-on experience with networking, routing and switching

You possess experience with Load Balancers, Firewalls, VPN, LAN, WAN, troubleshooting, and problem resolution

Understanding of Layer 2 and 3 network infrastructure

You possess good analytical & problem-solving skills

Good communication skills to liaise effectively with end users

Mikrotik, Cisco, Juniper and Linux Administration will be an added advantage
